Sage 100cloud

Trusted, Customizable, Connected Business Management Software

Sage 100cloud is built for security and compliance. Deep customizability means that it can meet your needs today and as you grow. And because its cloud connected you maintain control of your system while still leveraging the fundamental benefits of the cloud.

Sage 100cloud can either be on premise (on your local server) or hosted in the cloud. It is your preference.

With Sage 100cloud you can increase visibility by managing all your business processes in one place so you can spend less time on process, and more time on company growth.

You can decrease risk with granular security and comprehensive audit tracking, thus decreasing the risk of fraud. With Sage 100cloud you have the tools you need to comply with changing legislation and the requirements of your industry.

Flexibility- with a customizable UI, integrated workflows, mobile access, and numerous automation addons, Sage 100cloud is flexible enough to meet the changing needs of your business.

Sage 100cloud Features

Simplify your financials

- Automated Bank Feeds and Reconciliations
    - Simple and accurate monthly bank reconciliation
    - Automatic detection of unrecorded transactions, errors, and differences.
- A system built for compliance that keeps track of tax codes, audit histories, government reporting, privacy, and security

Customization - with Custom Office and Visual Integration

- Make it yours with custom scripting to import data across platforms and automate your processes with ease.

- Customize your UI (user interface) and data fields and data tables to ensure you are collecting the information you require to optimize your business and remain compliant.

Sales - Using Sage Contact

- Accelerate sale closure, enhance customer experience, and improve data integrity.
- View important customer and vendor information within Microsoft Outlook from any device.
- Customize permissions to grant access to information about customers' available credit, outstanding balances, and the average time it typically takes to settle a bill.
- Click through payment and invoice histories, review recent customer communication, and read memos.

Planning - Using Sage Budgeting & Planning

- Accelerate planning cycles to align operational and strategic decision-making.
- Shorten budgeting and planning cycles and make swift and informed business decisions.
- Improve precision, increase collaboration across business lines, and accelerate planning velocity.
- Streamline the integration between operational and strategic planning to align every corner of your business with clarity and vision.

Analytics - Using Sage Intelligence

- Use your existing Microsoft Excel knowledge to easily write and edit reports, giving you instant visibility across your business.
- Spend more time focusing on analysis and interpretation of your information and less time pulling the data together.
- Design customized reports that suit your business's unique requirements.
- Automate report delivery using Paperless Office.
